

Month 9: Dog Project

Students should choose one area of study for their project. Choices may include:

- 🐾 Being a Responsible Dog Owner
- 🐾 Safety around Dogs
- 🐾 Careers in Dogs
- 🐾 Dog Sports
- 🐾 Dog Training
- 🐾 Dogs with Jobs
- 🐾 Choosing a Dog

Other topics are possible and up to the teacher's discretion.

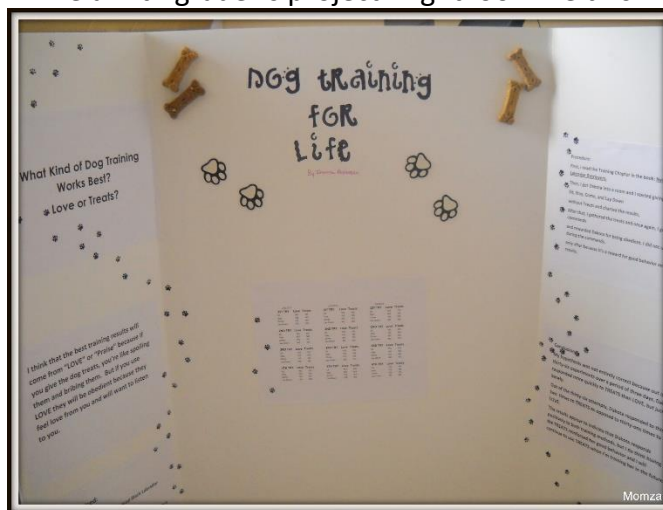

Students will choose a topic and create a report to present to the class. Expectations for the report should be guided by age.

For example, a second grader's project might look like this:

Dogs are perfect pets. Let me tell you why. First, dogs love to play. If you throw a ball, a dog will catch it. Next, dogs can protect you if a stranger is nearby. They will bark loudly. Another reason dogs make perfect pets is because there are so many kinds to choose from. Some popular kinds are Poodles, Pugs and Beagles. What kind of dog do you want?

While a fifth grader's project might look like this:

Students should be encouraged to have fun with this project and be creative. You may choose to give them specific guidelines such as:

- 🐾 Your report must contain at least 3 facts (or more for older children).
- 🐾 Your report must contain at least 1 picture (drawn or computer generated).
- 🐾 Your report must be about one of the topics we learned about.
