

Name:

AKC Canine Clubs-Community Dogs- Week 5

Types of Service Dogs:

- Guide Dogs
- Hearing Assistance Dogs
- Mobility Assistance Dogs
- PTSD, Anxiety and Depression Assistance Dogs
- Diabetic Alert Dogs
- Seizure Alert Dogs

Types of Working Dogs:

- Police Dogs
- Narcotics Detection Dogs
- Explosive Detection Dogs
- Search and Rescue Dogs
- Cancer Detection Dogs
- Other types of working dogs trained to sniff things (e.g. scat, electronics, poachers, etc.)

Diabetes

- Type 1 Diabetes: the pancreas does not secrete insulin and cannot break down sugar in the blood stream.
- Type 2 Diabetes: insulin production in the pancreas is compromised and the body cannot produce enough insulin to break down sugar in the blood stream.

Generalizing: applying something learned in one context and being able to apply it in another context. For example, if you teach a dog how to sit in your home, he will need a little more help learning how to sit in the car or on the street.
