

# The Löwchen Club of America

## **HEALTH STATEMENT**

Approved by the Board of Directors on March 31, 2020

The Löwchen is relatively free of health maladies with no breed specific issues that is a risk to life. While there have been cases of young dogs with medical concerns, the vast majority of health issues are a byproduct of aging. The recommended health tests for the Löwchen are patella exams, eye exams yearly, and hip evaluations.
