Parent Club Health Statement

The following are the health tests that the Board of Directors of the Alaskan Malamute Club of America consider both required and optional for all members and breeders of Alaskan Malamutes.

**Required Tests:**

- Hip Dysplasia – screening for hip dysplasia
- Eyes – screening for phenotype abnormalities
- Polyneuropathy – DNA test

**Recommended Tests:**

- Elbow Dysplasia – screening for elbow dysplasia
- Cardiac Disease – screening for congenital heart disease
- Thyroid Disease – screening for thyroid abnormalities
- Cone Degeneration – DNA test
- Primary Ciliary Dyskinesia – DNA test
