
Breed Temperament Guide

Breed Temperament

One of the things that makes a specific breed of dog unique is not only the dog's physical appearance, but each breed also has its own distinct temperament.

Each AKC breed has a national parent club (see akc.org).

Parent clubs describe their breed's ideal temperament in the written breed standard.

A summary of the temperament (as per the parent club's breed standards for each breed) follows.

Where an asterisk () appears, it indicates that there was not a specific section on temperament in the parent club's breed standard. The description in this guide for these breeds was based on information about the breed written by parent clubs.*

AKC Groups

Part 1

AKC has grouped all of the breeds that it registers into 7 categories or groups.

These are: Sporting, Hound, Terrier, Working, Toy, Herding and Non-Sporting.

These groups are based on function and heritage. They share traits of form and function or a common heritage.
